

Welcome to the 2015 IWMF Educational Forum

Imagine a Cure: Parade of Hope
Carl Harrington, President

I Love a Parade Cartoon

Resting South High Bulldog

Decoration Day

Thank you!

WABAC machine to 1995

Excited about technology

Woody and Buzz charmed us!

Dallas Cowboys Won the Super Bowl and Had a Parade!

1995 in WM

What is WM?
Where can I learn about
the disease? Where can I
find help? What kind of
treatments should I take?
How long do I have to
live?????

Treatments: Now and Then

4

Then:

- Chlorambucil (Leukeran)
- Other alkylating agents
- Fludarabine
- Cladribine

42

Now:

- Chlorambucil (Leukeran)
- Other alkylating agents
- Fludarabine
- Cladribine
- Rituximab
- Alemtuzumab
- Autologous stem cell transplantation
- Corticosteroids
- Bortezomib (Velcade)
- Bendamustine
- Ofatumumab
- Everolimus
- Ibrutinib (Imbruvica)
- Combinations of rituximab with other agents:
 - Alkylating agents
 - Nucleoside analogs
 - Bortezomib (Velcade)
 - Bendamustine
 - Thalidomide
 - Lenalidomide (Revlimid)
- Exploratory Drugs in clinical trials including:
 - Idelalisib
 - Panobinostat
 - Vorinostat
 - Carfilzomib
 - Oprozomib
 - GA 101
 - IMO-8400
 - INCB40093
 - ABT199
 - Epratuzumab
 - MLN0128

How many clinical trials are there that include WM as a condition?

- A. 10
- B. 25
- C. 50
- D. More than 50

Where do you come in?

We all need to pitch in

- WM is currently incurable.
- If we all pitch in with
 - our time
 - our \$
 - our willingness to participate in clinical trials

We can take the “in” out of “incurable.”

Now?

WM is currently **incurable**.

Goal

WM is curable.

Goal

WMM is curable.
