# THESE DREAMS AND YOURS COULD COME TRUE

**“ I dream of a world without WM for my children and grandkids and yours. ”**

*When Mom had WM in the 1970s, there were no treatments. WM made her life difficult, and it was agonizing for our family. In just a few years, she was gone. I've lived with WM for 13 years, and I'm grateful for the treatments that have made this possible. Thanks to IWWMF funded research, my life with WM is much easier than my mom's. But I want more. I want a cure. ”*

— Paul Kitchen

**“ My dream is to dance at my three-year-old granddaughter's wedding! ”**

*When I was first diagnosed with WM in 2003, my children were very young, and my wish was to live long enough to see them graduate from high school and to walk my daughter down the aisle at her wedding. Now that I've been able to do that, my wish is to be around to dance at my granddaughter's wedding! ”*

— Pete DeNardis

**“ My dream is to be as good a grandmother to my daughter's kids as my mom is to her. ”**

*When I was first diagnosed, in 2020, and my daughter Maddy was only 13, I prayed that as an only parent, I'd just be able to see her to adulthood. Now, my dream is more beautiful hikes, seeing her on more stages, doing her singing and acting, traveling together, and, one day, if her life takes her there, I would like to be as good a grandmother to her children as my mom is to her. ”*

— Julie Richardson

## RESEARCHERS SAY...

“ *The generous past support of the IWMMF has set the stage for an acceleration of research towards a cure.* ”

— Dr. Stephen M. Ansell, Mayo Clinic

“ *At the end of the day, do I believe there is a cure in sight for WM? Absolutely.* ”

— Dr. Steven P. Treon, Dana-Farber Cancer Institute

## A CURE IS IN SIGHT

**ACCELERATE  
THE CURE**  
**BY DONATING TODAY**  
[iwmf.com/ways-to-give](http://iwmf.com/ways-to-give)

# WE'VE MADE PROGRESS

Understanding the MYD88 genetic mutation  
found in 90-95% of people with WM

Development of BTK inhibitors, such as  
ibrutinib and zanubrutinib

From 4 treatments 20+ years ago,  
to 80+ treatments today

Increased life expectancy  
of 15 to 20 years

## BUT WE NEED A CURE

Government gives us nothing—  
So, it's up to us!
